BUILDING YOUR EUROPEAN PROJECTS

Days for ENERMAT

ENERMAT.aa is a European project focused on developing transnational partnerships around European centers of excellence. Its primary objective is to create or reinforce cooperation between international companies and research centers with the aim to design new materials - or improve the characteristics of existing ones - for producing, transmitting, converting, storing or even saving energy.

The main goal of this event is to gather SMEs and research centers specialized in the field of materials for energy.

CNRS, ENSICAEN and MIRIADÉ are pleased to invite you to
